FACTS PERTINENT TO ALL CLAIMS FOR RELIEF

18. On September 21, 1993, the United States Patent and Trademark Office ("the PTO") issued U.S. Patent No. 5,246,925 ("the '925 Patent"), entitled "19-nor-Vitamin D Compounds for Use in Treating Hyperparathyroidism," to Plaintiff WARF, the assignee of the named inventors Hector F. DeLuca, Heinrich K. Schnoes, Kato L. Perlman, Rafal R. Sicinski,

and Jean M. Prahl. Plaintiff Abbott is the exclusive licensee of the '925 Patent. A copy of the '925 Patent is attached hereto as Exhibit A.

19. The expiration date of the '925 Patent is April 17, 2012.

20. On December 24, 1996, the PTO issued U.S. Patent No. 5,587,497 ("the '497 Patent"), entitled "19-nor-Vitamin D Compounds," to Plaintiff WARF, the assignee of the named inventors Hector F. DeLuca, Heinrich K. Schnoes, Kato L. Perlman, Rafal R. Sicinski, and Jean M. Prahl. Plaintiff Abbott is the exclusive licensee of the '497 Patent. A copy of the '497 Patent is attached hereto as Exhibit B.

21. The expiration date of the '497 Patent is December 24, 2013.

22. On October 24, 2000, the PTO issued U.S. Patent No. 6,136,799 ("the '799 Patent"), entitled "Cosolvent Formulations," to Plaintiff Abbott, the assignee of the named inventors Lukchiu Li, Edward Anthony Pec, Daniel H. Robinson, Dennis A. Stephens, Kathee Jantzi, Thomas Barton May, and John Paul Oberdier. A copy of the '799 Patent is attached hereto as Exhibit C.

23. The expiration date of the '799 Patent is April 8, 2018.

24. On March 26, 2002, the PTO issued U.S. Patent No. 6,361,758 ("the '758 Patent"), entitled "Cosolvent Formulations," to Plaintiff Abbott, the assignee of the named inventors Lukchiu Li, Edward Anthony Pec, Daniel H. Robinson, Dennis A. Stephens, Kathee Jantzi, Thomas Barton May, and John Paul Oberdier. A copy of the '758 Patent is attached hereto as Exhibit D.

25. The expiration date of the '758 Patent is April 8, 2018.

26. The '925, '497, '799, and '758 Patents (collectively, "the patents-in-suit") are listed in a United States Food and Drug Administration ("FDA") publication entitled *Approved Drug Products with Therapeutic Equivalence Evaluations* (known as the "Orange Book") as covering paricalcitol, which is marketed by Abbott under the brand name Zemplar®.

27. Zemplar® has also received pediatric exclusivity of 6 months beginning from the expiration of each of the '925, '497, '799, and '758 Patents, during which no ANDA covering paricalcitol can be approved. Thus, no ANDA that infringes the '925 Patent can be approved prior to October 17, 2012; no ANDA that infringes the '497 Patent can be approved until June 24, 2014; and no ANDA that infringes the '799 or '758 Patents can be approved until October 12, 2018.

28. On information and belief, through the coordinated efforts of research and development staff in Europe and North America, Sandoz GmbH continuously seeks to expand the range of generic products it sells.

29. On information and belief, Sandoz USA and Sandoz GmbH collaborate in the manufacture, marketing and sale of many pharmaceutical products (including generic drug products manufactured and sold pursuant to an approved abbreviated new drug application) within the United States generally and the State of New Jersey specifically.

30. On information and belief, Sandoz GmbH actively reviews pharmaceutical patents and seeks opportunities to challenge those patents.

31. On information and belief, Sandoz GmbH reviewed the patents-in-suit and certain commercial and economic information relating to Zemplar®, including estimates of the revenues

generated by the sale of Zemplar®, and decided to file an ANDA, seeking approval to market a paricalcitol injection.

32. On information and belief, Sandoz USA and Sandoz GmbH collaborated in the research, development, preparation and filing of Abbreviated New Drug Application No. 91-108 for a paricalcitol injection.

33. On information and belief, Sandoz USA submitted to the FDA Abbreviated New Drug Application No. 91-108, seeking approval to engage in the commercial manufacture, use and sale of a generic paricalcitol injection, prior to the expiration of the patents-in-suit.

34. Plaintiffs have received two letters dated February 19, 2008 [*sic*, 2009] and February 23, 2009 from Sandoz USA notifying them that Sandoz USA's ANDA No. 91-108 includes a certification under 21 U.S.C. § 355(j)(2)(A)(vii)(IV) (a "Paragraph IV certification") that, in Sandoz USA's opinion, the patents-in-suit are invalid, unenforceable or will not be infringed by the commercial manufacture, use or sale of the generic paricalcitol injection described in ANDA No. 91-108. To be clear, Plaintiffs received the Sandoz USA Paragraph IV certification letter dated February 19, 2008 on or about February 20, 2009, making it clear that Sandoz USA's Paragraph IV letter mistakenly listed 2008 as the date instead of 2009.

35. On information and belief, Sandoz GmbH made the ultimate decision to file ANDA No. 91-108 with the FDA, and encouraged and directed Sandoz USA to file ANDA No. 91-108 and Paragraph IV certifications, and Sandoz USA did so at Sandoz GmbH's direction.

36. On information and belief, Sandoz GmbH was necessarily aware of the patents-in-suit when it directed Sandoz USA to file ANDA No. 91-108 and the Paragraph IV certification.

37. Plaintiffs commenced this action within 45 days of the date they received Sandoz USA's notices of ANDA No. 91-108 containing the Paragraph IV certification.

38. Sandoz USA purported to include an "Offer of Confidential Access" to ANDA No. 91-108 along with its Paragraph IV Notice sent to Plaintiffs. The Federal Food Drug and Cosmetics Act, 21 U.S.C. § 355(j)(5)(C)(i)(III), specifies that an offer of confidential access "shall contain such restrictions as to persons entitled to access, and on the use and disposition of any information accessed, as would apply had a protective order been entered for the purpose of protecting trade secrets and other confidential business information."

39. Sandoz USA's Offer of Confidential Access to Plaintiffs restricted disclosure to two attorneys at Plaintiffs' outside law firm and certain of their support staff. Sandoz USA's Offer of Confidential Access to Plaintiffs also restricted disclosure to unspecified sections of ANDA No. 91-108 that Sandoz USA in its sole discretion would choose to make available to Plaintiffs at some point in the future.

40. The proposed terms of Sandoz USA's Offer of Confidential Access to Plaintiffs did not allow any of Plaintiffs' in-house litigation team members, who are crucial decision-makers in the process of filing any infringement action, access to the necessary information with which to decide whether Sandoz's proposed generic copy of Abbott's paricalcitol injection likely infringed Plaintiffs' patents. Furthermore, under the proposed terms of Sandoz USA's Offer of Confidential Access, Sandoz USA could have technically complied by making very minimal disclosures to Plaintiffs.

41. Soon after receipt of Sandoz USA's purported Offer of Confidential Access, Plaintiffs' outside counsel requested that Sandoz USA amend its Offer of Confidential Access to permit six lawyers at Plaintiffs' outside law firm, as well as designated in-house litigation team

members at Abbott and WARF, to gain access to nine particular sections of Sandoz USA's ANDA No. 91-108 likely to bear on the composition of Sandoz USA's proposed generic copy of Abbott's paricalcitol injection. Sandoz refused to comply with almost all of Plaintiffs' requests for modifications to Sandoz USA's Offer of Confidential Access, the exception being that Sandoz USA agreed to grant access to ANDA No. 91-108 to six members of Plaintiffs' outside law firm.

42. After Sandoz USA refused almost all of Plaintiffs' requests for modifications to Sandoz USA's Offer of Confidential Access, Plaintiffs' outside counsel asked that Sandoz USA reconsider and permit access to ANDA No. 91-108 on the terms needed by Plaintiffs in order to make an informed investigation of Sandoz USA's potential infringement of Plaintiffs' patents. Sandoz USA has not responded to that request for reconsideration as of the filing of this Complaint.

43. Sandoz USA's Paragraph IV Notice does not contend that Sandoz USA's proposed generic copy of Abbott's paricalcitol injection will not infringe the '925, '497, and '799 Patents. Therefore, Plaintiffs believe that Sandoz USA's proposed generic copy of Abbott's paricalcitol injection will infringe the '925, '497, and '799 Patents.

44. No Abbott or WARF client representative has been permitted to review information concerning Sandoz USA's proposed generic copy of Abbott's paricalcitol injection beyond that which is set forth in Sandoz USA's Paragraph IV Notice itself. That Paragraph IV Notice does not specify the composition of Sandoz USA's proposed generic copy of Abbott's paricalcitol injection. Consequently, through no fault of its own, Plaintiffs have not been able to analyze the basis, if any, for Sandoz USA's assertion that its proposed generic product would not infringe the '758 Patent. Plaintiffs believe that Sandoz USA's assertion that its proposed generic

product would not infringe the '758 Patent is likely without merit, in that Sandoz USA would presumably disclose any meritorious defense of non-infringement to Plaintiffs so as to avoid potential litigation.

45. Under the proposed terms of Sandoz USA's Offer of Confidential Access, Plaintiffs' outside counsel are permitted solely to advise Plaintiffs whether or not to bring an action for infringement of the patents-in-suit, without discussing any information derived from ANDA No. 91-108 that forms the basis for such advice or that would bear upon the merits of any potential action. Plaintiffs dispute the restrictions unilaterally imposed by Sandoz USA and will seek entry of a protective order permitting Plaintiffs' in-house counsel access to Defendants' proposed product composition whereby Plaintiffs may evaluate the basis, if any, for Sandoz USA's Paragraph IV Notice concerning Plaintiffs' '925, '497, '799, and '758 Patents.

46. Defendants have committed acts of infringement of the '925, '497, '799, and '758 Patents that creates a justiciable case or controversy between Plaintiffs and Defendants. Pursuant to 35 U.S.C. § 271(e)(2)(A), Defendants committed an act of infringement by filing an ANDA with a Paragraph IV certification that seeks FDA marketing approval for Defendants' generic copy of Abbott's paricalcitol injection prior to expiration of the '925, '497, '799, and '758 Patents. This Court has subject matter jurisdiction with respect to this action to declare Plaintiffs' rights under the '925, '497, '799, and '758 Patents.

47. On information and belief, Sandoz USA and Sandoz GmbH continue to collaborate in seeking approval of ANDA No. 91-108 from the FDA and intend to collaborate in the commercial manufacture, marketing, and sale of a generic paricalcitol injection (including commercial marketing and sale of such products in the State of Delaware) in the event that FDA approves ANDA No. 91-108.
